From dark to bright in under 2 minutes

- ✓ **Pneumatic operation allows for quick and easy installation**
- ✓ **5 metre Mast extension for greater height and visibility**
- ✓ **Choice of halogen lamp options to suit lighting requirements**
- ✓ **Choice of petrol/diesel generator options**

Mini*Lite*

**Safe, secure and stable
in all weathers!**

The mast consists of 5 sections, each section fitted with a "Twin-Lock" system to prevent the mast from turning in the wind. The stability of the unit is provided by the heavy duty bipod mounting arrangement which means that the mast is stable in wind speeds of up to 100km/h. The integral shock absorption system prevents the mast from lowering too quickly.

Technical Data

- Pneumatically operated mast with fixed hand pump
- 5 M Mast extension
- 4 x 750 w Tungsten lamps or 1x 1000 w metal halide lamp
- 'Twin lock' 5 section Mast
